

# Editing like a boss

We love finding new apps to edit and create epic content with. Here's 5 of our favourites, tested and approved by us.

## *Snapseed*

This free app is available on IOS and Android. It allows your to edit your photos to a very high standard, competing with the likes of Lightroom for quality.

We use it for general image adjustments and details.

## *A Color Story*

This is a free app (with purchasable features) available on IOS and Android. It has beautiful image filters, effects and editing tools. We love it for the filters... Ice Ice is our fave!

## *Lifelapse*

This is a free app (with a pro membership available to access more features). This app allows you to create stop motion videos with images which are great for showcasing products in a fun way!

## *Jumprope*

Another free app that is available of IOS and Android. It allows you to create instructional videos for social media, especially great for recipes or tutorials. We love them to share step by step tutorials.

## *Canva*

This app is free (with membership available for other features) and available on IOS, Android, and desktop. This app is great for creating social media tiles that have high impact and quality features. We use this for creating testimonial posts and announcements for social media.
